**INVITATION to COLLABORATION**

We invite the staff of your university to take part in conducting joint scientific research as part of the implementation of the program of bilateral scientific and technological cooperation.

The preliminary theme of the project: Comprehensive Research of the influence of dynamic microclimate on the behavior of the electromagnetic field of the non-ionizing spectrum in gases. Research directions: electromagnetic field, instrumental control, temperature, humidity, air velocity, empirical patterns, theoretical model, physical mechanisms, mathematical model, computer modeling, numerical model, intensification, reduction, electromagnetic environment.

Briefly about the scientific supervisor from AltSTU: Titov Evgeny Vladimirovich, Doctor of Technical Sciences, Professor, is the specialist in the field of the automation of control and monitoring of electromagnetic fields and radiation of the non-ionizing part of the spectrum, of the finite difference methods of computer simulation, of the computational electrodynamics, of the spectral analysis, of the thermography, of the electromagnetic safety.

We will gratefully accept comments and constructive suggestions for the application being generated. If you or your colleagues are interested in this area of scientific research, then we will be ready for mutual cooperation.

Rector,  
Doctor of Technical Sciences,  
Professor

A.M. Markov
